European Stroke Conference

Thanks to everyone that attended the ENOS/IST-3 Investigator Meeting at ESC in Hamburg in May. The slides from the meeting will be uploaded to ENOS website.

Above (L to R): Prof Daniel Berecki, Prof Peter Sandercock, Dr Eivind Berge

Day 7 CT Scans

We are aware that there are a number of different reasons why some centres have not performed day 7 scans for ENOS. If it is at all possible, please revisit the original decision, as circumstances may have changed and it may now be possible to perform the scans. In addition, if it is possible to check back retrospectively to find out if the patient had any routine scans or MRIs, within the 7 day period following randomisation, then please upload or send these to ENOS. Please remember to carry out day 7 scans for ENOS patients whenever this is possible.

Tips of the month

- Day 7 CT scans should be ± 1 day, so day 6, 7 or 8 only.
- Please randomise to the continue/stop arm of the trial as numbers are falling.

ENOS now has 129 recruiting centres in 17 countries.

More centres are still welcome.

Craigavon Area Hospital	1
Cumberland Infirm, Carlisle	1
Darlington/Bishop Auckland	88
Derby Hospitals	53
Diana Princess, Grimsby	6
Doncaster	27
East Surrey Hospital	1
Edinburgh Royal	7

Ysbyty Gwynned, Bangor	1

Congratulations to....

- East Surrey Hospital, UK and Altnagelvin Area Hospital, UK for recruiting their first ENOS patients.
- Hillingdon Hospital; Chelsea and Westminster, UK for taking their first repatriated patients.
- Assiut University, Egypt for recruiting 21 patients in 90 days.
- Assiut University, Egypt; Mures County Emergency Hospital, Targu-Mures, Romania; Lincoln County Hospital, UK; Al Zahraa Hospital, Egypt and Western Infirmary, Glasgow, UK for being the highest recruiting centres in the last 90 days, recruiting at least 6 patients in 90 days.

Blood pressure readings

If the ENOS website rejects your blood pressure readings:

- check the readings are appropriate for the patient.
- check the OMRON machine against ward readings.
- if you are confident that the readings are correct, then input 50 for systolic or diastolic and/or 30 for heart rate.
- THEN fax us a data correction form with the correct readings and we will alter these centrally.
- Please submit as many correct readings as possible and only submit dummy readings (for data correction) for those that are rejected by the system.

New Centre

Welcome to new centre, Assiut University Hospital in Egypt from ENOS.

The Principal Investigator is Professor Eman Khedr (front row, centre) joined by her team, and they have already recruited 28 patients.

Data Monitoring Committee

The ENOS DMC met on the 13th June and reviewed the data that were available on the 2301 patients randomised. There are no concerns and no reason to modify the protocol or intake to the study. The letter of approval is on the ENOS documents website.
