Dear Philip

ENOS DMC

The Data Monitoring Committee met by teleconference on 13 December 2006 and reviewed the data that were available for the 520 patients randomised. The Committee had no concerns and saw no reason to modify the protocol or intake to the study. The Committee commends the investigators for the high quality of the data.

The Committee strongly endorses the investigators' plan rapidly to increase the number of active centres and hence increase the recruitment rate.

The next full review of the data will occur on 5 December 2007.

Yours sincerely

Professor Peter Sandercock, MA, DM, FRCPE, FMedSci
Chair, ENOS Data Monitoring Committee
