ENOS NEWS

The Newsletter for the 'Efficacy of Nitric Oxide in Stroke Trial'

Yeovil visit

This month we are pleased to welcome Dr Qadiri and his team from Yeovil District General Hospital, Somerset, UK as a new site. We wish them well and congratulate them on having recruited their first patient already ! This now brings the total number of centres to 19 and we look forward to welcoming further new centres.

Data Monitoring Committee

The Data Monitoring Committee met on the 3rd November to review data on the first 282 patients randomised. In reviewing the safety and efficacy data the Committee had no concerns and recommended the trial continue recruitment. The committee congratulated the investigators on the progress made over the last year and the high quality of the data.

Investigator meetings 2005

We are planning to hold an International Investigators meeting at the European Stroke Conference in Bologna May 2005. Further details will be provided nearer the time. Prior to this is our UK investigator meeting at the University of Nottingham on April 12th 13th. Spaces are still available if you would like to attend. There will be an opportunity to meet and discuss issues relating to the trial at both meetings.

Welsh Stroke Conference

It was a pleasure to attend the fourth Welsh Stoke Conference in Gwent on 26th November 2004 and meet potential new investigators. The meeting was well attended with some excellent speakers.

Happy Holidays

We would like to wish all our investigators a happy holiday season and all the best for the coming New Year.

***** Less than 60 patients to go until ENOS is the largest acute stroke BP trial so please keep recruiting!*****
